DETAILED ACTION

This Office action is in response to the application filed August 21, 2001.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 42 recites the limitation "colorant dye" in line 1. There is insufficient antecedent basis for this limitation in the claim which depends from claim 1.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-46 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by HALEY et al.

The claimed invention is drawn to an imageable composition comprising: an acid curable composition; an acid generator; an infrared absorber; and optionally a colorant; wherein at least one of said infrared absorber and said colorant has a counter anion derived from a non-volatile acid.

HALEY et al anticipates the claimed invention at Examples 1-6 wherein the prior art discloses an acid curable composition having an infrared absorber with a counter anion derived from a non-volatile acid.

Art Unit: 1752

No claims are allowed.
